RACIAL ABILITIES

Impressive resilience - When you are the target of an attack, you may use your reaction to gain Resistance to damage for a number of rounds equal to a roll of the TD. You may use this ability once per long rest. While this ability is active, you cannot be reduced below 1 HP (regardless of how much damage you take).

Robust - Unas add +4 to their Strength to determine how much they can lift or carry. In addition, they gain advantage on Strength checks made to lift, carry, or push (such as battering open a door).

Claws - Unas have claws that can be used as a melee weapon that deals 1d6 damage.

FEATS

Vanguard - You deal +1d6 additional damage with ranged attacks against any target within 5m.

Uncanny Dodge - When an attacker that you can see hits you with an attack, you can use your reaction to gain resistance to the damage. This ability does not function against attacks that deal damage in an area or cone (but it does work against line effects).

Scout's Cunning - You can take a bonus action on each of your turns in combat. This action can be used only to take the Dash, Disengage, or Hide action.

Evasion - When you are subjected to an effect that allows a Dexterity saving throw to take only half damage, you instead take no damage if you succeed and only half damage if you fail.

Attack Specialist (Bows) - When making attacks with that proficiency you roll twice as many weapon damage dice as normal. Bonus dice from other sources (such as Power Attack or Vanguard) and static modifiers (such as from Strength and Dexterity), are not doubled.

Rapid Reload - You reload weapons in half the normal actions (rounding up).

CLASS ABILITIES

Survivalist - You've trained to survive on any world and in any biome. You gain resistance to damage from your environment, including non-natural environmental dangers like traps.

Field Hack - Tracking - You gain advantage on all Survival checks made to track.

Field Hack - Ranger Tricks - During a Traversal encounter, if you succeed at a Terrain card's Navigation check, you navigate an additional 1d3 cards from the Journey deck instead of 1.

Trap Rigging (pg 53) - You can use excess equipment to booby trap a 1m area as an action. You can scavenge parts for a number of traps equal to your Proficiency bonus, refilling these parts during any long rest. When a character enters the designated 1m area it will trigger the trap, but characters may make a Perception check (DC 8 + your Proficiency bonus + your Wisdom modifier) to notice the trap before entering the area.

Field Hack - Xenosurvival - Once you have taken a short or long rest in an environment, choose a number of additional characters up to your Proficiency bonus to benefit from your Survivalist ability while in the environment until

NOTES

Oringo was a key player in the bloody revolt against the System Lords, seeking freedom for his people and their human allies. He rarely fought on the front lines, but his infiltration prowess got him into, and out of, places that few could breach. After obtaining a vital piece of logistical information the Tau 'ri from the Stargate were able to launch an assault and free his people.

Where his intel had helped the freedom fighters determine their next step, this blow saw several planets liberated, but at the cost of his anonymity. Oringo considered it his mission to free the Unas from the tyranny of the Goa 'uld overlords. When he joined the Phoenix Site, General Loyer was quick to notice his unique abilities and soon put him to work gathering intel for Phoenix-1. In return for which, Oringo struck a deal to keep the Unas' presence confidential in order to protect his people.
